

Chefsville-Kids: Motion, Force and Energy

(Assembly and Classroom Programs)

On-Campus

Time: 9am - 2:15pm, evenings for PTA/PTO orgs

Grades: K – 5

Community/Family, Talented/Gifted, Special Ed, Bilingual

Description

Food is a fantastic vehicle to provide an exciting learning adventure that will captivate students as they are the “STARS” in this grade level program. Students discover the exciting and incredible world of cooking, health and nutrition through the passions of a real Chef as they see how to apply Science.

This program is all about the history of and understanding the uses of motion, force and energy in today’s society. The food world is responsible for much in industry and has cutting edge dishes based on food science that uses motion, force and energy

Students will shine as they explore scientific processes and concepts in order to engage their world as it relates to cooking, health and wellness. Age/grade appropriate exercises and demonstration of real-world scenarios using scientific concepts will help students discover and make sense of their world. Lively cooking and engaging activities; informative lessons; games; and relays allow students to develop life-skills to make healthier choices for their success.

Students will

- explore different forms of energy
- observe different forms of motion and how forces act on objects
- investigate and predict effects on objects by varying energy
- learn about patterns of movement
- discover magnetism and its effect on different materials
- explore the uses of energy in daily life, especially through in the culinary food world
- partake of a cooking demonstration and tasting using energy on foods
